INTRODUCTION

These are important times in mental health care delivery. Managed care, privatization, comprehensive community service systems are among the new and challenging initiatives before us. Equal in value are similar advances in astute clinical care, empirical data-based research, and sound theory building that extends the boundaries of our knowledge about mental illness.

In today's age, no health care provider can be fully knowledgeable in all specialty areas of practice. The purpose of this Speakers Bureau is to begin to address this need by bringing together the finest specialists in the State with the Department of Mental Health state and provider employees who provide the daily direct care to the client/consumers entrusted to us. The goal of the Bureau is to enhance our mutual understanding of mental illness and to improve the quality of services that we collectively provide.

Each specialist has volunteered to provide one one-and-one half-hour presentation to any DMH state or provider agency that makes such a request. The specialist consultant could be asked to provide a didactic presentation in his or her area, staff a case consultation in the specialty area, serve as a panelist in a forum to discuss clinical or theoretical issues, and so forth. This service is provided at no cost by the speakers and their participating agencies.

Each agency is permitted one speaker in any given fiscal year. All requests for speakers should be made to the Administrative Assistant in the Central Office Training Program (617-727-5500 X417). No agency is permitted to call speakers directly, no agency may use the Speaker Bureau to staff its weekly or monthly conferences for a year, and no agency may request a speaker for a program that has paid registrations. Any agency that calls a speaker directly will forfeit its speaker for the year. The Speakers Bureau is not operational in the summer months.

A project of this scope would not be possible without the support of its participating institutions. Eileen Elias, Commissioner, M. Annette Hanson, MD, Deputy Commissioner for Clinical and Professional Services, and the Area Directors have provided the full support of the State's Department of Mental Health. The Chairs of the Department of Psychiatry at the State's four medical schools have been equally supportive. Louis Vachon, MD, Boston University, Joseph Coyle, MD, Harvard University, Marshall Folstein, MD, Tufts University, and Paul Appelbaum, MD, University of Massachusetts have generously made available their various faculties. Cooperation for a project such as this would be expensive in the best of times; in an era of fiscal austerity, it is truly remarkable.

My thanks to each person noted above, to each of the managers at the various institutions who administer the Speakers Bureau at the local level, and to all the speakers for their generosity in volunteering to share with others what they have learned about mental illness, mental health, and the provision of such knowledge to those in need.
